VOLUME XVII NUMBER 40

WAINWRIGHT ALBERTA, WEDNESDAY AUGUST 12th, 1925

Price \$2.50 Per Year in Advance

MR. G. HOLLINGSHEAD NEW PRINCIPAL OF WAINWRIGHT SCHOOLS

The regular meeting of the school Board was held at the residence of the chairman (school not being available by reason of its being under repair) when all members were present.

Prosser-Boyd—That the minutes of last meeting be adopted as read—Carried.

A communication was received from Miss H. D. Keith making application for principalship of Wainwright Schools and the secretary was instructed to advise Miss Keith that her application was received and to be considered by the Board.

Prosser-Washburn—That the school grant for term ending Dec. 31st, 1924 be acknowledged and cheque deposited in bank—Carried.

Washburn-Bowman—That the report of the Finance Committee be accepted and the following accounts ordered paid—Carried.

Wainwright Star, stationery 17.25
M. Greer, salary July 100.00
S. E. Bowman Expenses to Edmonton 10.00
Secretary-Treasurer Salary 10.00
Bowman-Washburn—That the account of Mr. J. Taylor and Alice Lamb be referred to property Committee for report and recommendation of payment—Carried.

Trustee-Bowman reported that under instructions from Wainwright School Board, re-appointment of a principal for the school, he had interviewed some of the officials of the Dept. of Education, and on their recommendation had engaged Mr. G. F. Hollingshead to be principal of Wainwright school at a salary of \$2100.00 for one year.

Boyd-Washburn—That the report of Trustee-Bowman regarding appointment of principal for school be accepted, and that Secretary have the necessary contract drawn up with Mr. Hollingshead—Carried.

The meeting then adjourned.

FINAL RESULTS OF HIGH SCHOOL EXAMS & PUBLIC PASSING

The completion of the list of second year high school examinations is now available, and the results are listed in three divisions.

This gives those who passed in (1) eleven units, (2) passed in six units, and (3) passed in six units. Statements of marks obtained are being forwarded to all scholars who failed in any unit. Candidates who failed in history 2 or in the second unit of a language will have an opportunity to write on the university matriculation examinations which will be held beginning August 31st at several centers in the province including Wainwright. While the courses in algebra 2 and geometry 2 are not identical with the grade XI courses in these subjects, those who desire may write on the grade XI papers during the examination. These are the only units of the second year exams which may be re-written in September.

The department can give no undertaking to announce the results of applicants against the findings of the mid-summer examinations prior to the opening of schools. Unsuccessful candidates should return to school to be graded in accordance with the results as announced pending the receipt of the results of the appeals.

The following candidates were successful in passing and in additional units were indicated—

GRADE X.
Seven credits—George A. Taylor (French, 2)
Six credits—Lillian E. Bloom
Five credits—Mary E. Fish, Jean Marshall, and Jessie S. Sutherland.

A number of other students in this group obtained credits in some subjects in grade X, and completed subjects in which they were formerly deficient in grade IX.

GRADE VIII.
In the examinations in grade XIII which admit pupils to high school training next year, the following were the successful students here—
Laurence Beauregard, Yvonne Bisson, Isabel Love, Lulu Prosser, Violet Taylor, Jack Taylor, Mildred Terpening, and Ada Wiley.

*Threshers' Lien Note Books at The Star office.

CLAIMS POOL BELOW AVERAGE CASH PRICES

The Grain Trade News published at Winnipeg says, under date of July 29th: The basis of \$1.55 on which the pool is making payments is not only below the average daily cash price from Sept. 1 to July 15, of \$1.71 1/2, but is below the average price of any single month in the period with the exception of September. The average daily price in September was \$1.42 1/4 while the average price in October was \$1.59 1/4. In November, \$1.64 1/4, and in December, \$1.72 1/4. Even the month of April, in which the big break occurred, had an average price of \$1.56 and the average price in the other months were relatively high. In fact, in the first three weeks of September, comparative light and the prevailing prices when the bulk of the wheat was delivered in the first four months averaged several cents above \$1.55, and those accepting such current prices received full payment and were saved interest and also escaped further carrying charges.

EXAM REPORTS SHOWN TO BE LOWER IN PROV.

Dear Sirs—My attention has been drawn to the report of the examination results of "Wainwright high" appearing in last week's "Star."

While I am not attempting to uphold the mass efforts of the high school students I will say that, with one or two exceptions, the results are just what were expected. Early in the spring I appealed to the parents to see that their children put in at least two hours per night on their home studies, but in many cases the lust for pleasure seeking went on unabated.

Contrary to the statement "Let no one be foolish enough to extend sympathy to those students who failed," I am of the opinion that the students of the high school and grade VIII, deserve a good measure of sympathy because of the handicap under which their work was carried on this year. The four months' illness of Miss Keith at the beginning of the year and the three months' illness of the writer at the end of the year made it difficult for the students. In both instances after some delay, a substitute teacher secured who was not necessarily strange to the pupils and the school, notwithstanding that they did their best to carry on the work.

Re the criticism offered as to the results of the grade XI class, it might be apropos to point out that in the near by towns of Viking and Tofield of the six students in the former and five in the latter writing this grade note one made the pass. At Wainwright twelve wrote and six (50%) made the aggregate; three being conditioned in arithmetic which was a very tricky paper and proved a stumbling block to a very large number of pupils writing this grade throughout the province.

Re grades XI and X it is impossible for the lay person, without access to the records of the school, to express a sound opinion based on the results appearing in the Edmonton press as several of the candidates wrote only some of the subjects in each grade and, therefore, their names would not possibly appear in the list published. These are advised privately by letter from the Department as to their success or failure.

There are other features which to some extent have militated against the work of the high school this year which, for the sake of the school, I have refrained from citing. There is one aim during the four-and-a-half years that I have been principal has been the welfare and harmonious working of the entire school and staff, and I am convinced enough to believe that I am leaving the Wainwright school with everything working in harmony and with the classes in good standing.

I would like to point out that in 1921 when I took over the duties of principal there was an average attendance in the high school of twenty-one pupils, while this year the average attendance has been fifty students. This large increase in numbers has been partly due to the successful record of the school and it appears to me that it shows very poor taste, to say the least, to attempt to publish adverse criticisms of the results without any attempt to comparisons with other schools or reference to the difficulties under which this work was carried on this year.

W. E. Suckling

VAST OIL FIELD SWARMS WITH NEW ACTIVITIES

Movement on foot to organize all oil men from rough-necks in field to curbstone promoters.—Exitement prevails when pump starts at No. 3B at week end.

Another completion in the Wainwright oil field causes a big flurry at No. 3B well pumps out a continuous stream of high-grade oil through a 1 1/2 inch pipe.

When referring to the possible productivity of this well, the Star made a statement that it was far too soon to make any prediction as to what the well would produce, but the statement was made that wells in the States with only half the showing of this well were producing over 500 barrels daily.

Now that the pump has been going full blast for the past few days and nights, the volume of oil in the well has steadily increased, evidently caused by the suction of the pump drawing the choking sands from the perforator pipe at the bottom of the well.

It is certainly most invigorating to see the steady stream of this high-grade oil pouring a continuous flow through a three-inch pipe, and also to know that instead of this pumping the well dry, the oil has steadily risen in the twenty three hundred feet of eight inch pipe.

From latest reports, it looks as if the oil well soon will be flowing over the top of the casing and the excitement in the field would seem to be well justified. We learn that British Petroleum stock jumped to thirty-five cents a share on the open market. Wainwright Dome is at fifty cents a share, and Interior at forty-five cents. What other stocks on the market are selling for we have been unable to learn as we go to press.

Imperial Oil officials are here again on the ground, among whom, we notice Mr. Applegate and Mr. W. McAdams, which fact of itself, is quite significant at this time.

Oil leases have taken a jump, and prices are ranging from five to fifty dollars per acre according to location with the trend of the demand being to call ministers.

So far the Presbyterian leaders are confident that by the end of this year they will have over one thousand congregations with a membership of approximately 150,000 members.

The work in the Foreign Field is progressing in a wonderful manner with a large competent staff of missionaries at work.

TWO SCHOOL DISTRICTS UNITE IN GOOD PICNIC

The annual school picnic of Grangeville and Sligo, under the auspices of Miss Withnell of Sligo, and Lane of Grangeville, was held at Gooseberry Lake on July 31st.

The sports which were enjoyed by all included ball, handicap and obstacle races. Grangeville carried off the honors for the racing.

During the afternoon the men enjoyed themselves with horseshoes. One of the main items of the afternoon's entertainments was a coconut shy conducted by Messrs J. Ford and Postans. Owing to the warm weather many enjoyed the sport in the lake.

A delicious supper was served by the parents of the children at 6:30 p.m. After supper the ball games took place.

The results were as follows—Football, 0-0; baseball 7-9 in favor of Sligo.

The proceeds of booth and coconut shy are being held in the picnic fund to help with next year's picnic to which every one is looking forward.

Owing to the lovely weather and the social spirit of the two communities everyone voted that they had thoroughly enjoyed themselves.

VERY LATEST—We have preached "high grade gas" in the field, along with oil and yet more oil, but from the tremendous amount of gas and exhilaration all Tuesday night, the boys safe put any Texas town in the discard. On making enquiry as to the cause, the reply was "A barrel every three minutes, and still rising!" This makes the No. 3B well top the 500 barrel mark. Boys, don't let it occur again—least until the next well comes in!

the south-east of the present wells. If there ever was a time when excitement over the results of drilling for oil in this field was justified, it certainly is now, and the speeding up of more rigs being brought in is now in evidence.

The Star's warning of making premature statements as to production of this well, seems to have been well taken, and the behaviour of this well on the pump is certainly sufficient cause for rejoicing. It would appear as if the five-hundred barrel mark for this latest producer is within the bounds of reason; but whatever it is there is now no doubt of it being a very productive commercial well of considerably higher grade of oil than has been obtained in the other wells drilled in this field.

From present activity in the field and the great demand for information from outsiders, there is every reason to believe that the well is a "BURNING BUT NOT CONSUMED"

The Rev. Dr. White of Calgary who preached on the above subject at St. Andrew's Presbyterian Church at the morning service last Sunday conveyed to the congregation the interesting information that the Presbyterian Church in Canada was making good progress along all lines and that there was occasion for deep thankfulness that although handicapped by the hot season, forty-three of the fifty presbyteries have completed their organization, elected officers and are filling all vacant pulpits from here to the united church.

Recent date show that here are actually 750 self-supporting congregations with 150 ministry groups, which have also been organized into self-supporting charges and are ready to call ministers.

So far the Presbyterian leaders are confident that by the end of this year they will have over one thousand congregations with a membership of approximately 150,000 members.

The work in the Foreign Field is progressing in a wonderful manner with a large competent staff of missionaries at work.

WEDDING BELLS

ARTHUR-MUTTART

The home of Mr. and Mrs. A. B. Muttart, 1104 8th street, was the scene of a very pretty wedding on Friday, July 31, at 8:30 o'clock in the evening, when Pearl Asthore Muttart was united in marriage to Mr. Elza N. Arthur of Wainwright. The ceremony was performed by the Rev. F. C. Cornish of St. Stephen's church, beneath an arch decorated with green foliage and cut flowers.

The bride entered the living room escorted by her father, who gave her in marriage, to the strains of the wedding march played by Emily Muttart. She was lovely in a gown of shadow blue French crepe with seed pearls and veil of embroidered net held in place with a wreath of orange blossoms. Her shower bouquet was of opelia roses. Mary Muttart was of sweet little flower girl in a pale pink embroidered organza dress and carrying a fancy basket of pink and white sweet peas tied with pink tulle.

At the conclusion of the marriage ceremony the hymn, "Blest Be the Tie That Binds," was sung.

The wedding supper was served from small tables placed in several rooms. A table decked with white silk ribbons and vases of sweet peas was centered with the wedding cake. The hostess was assisted by Mrs. F. Walker, Mrs. W. Tandy, Mrs. O. Sutherland and Miss Sutherland.

During the evening a musical program was contributed by Mrs. Emily Muttart, Miss Mary Muttart, and Miss Grace Allen.

About thirty guests all relative and intimate friends were present. The bride received many beautiful and useful gifts, including one which is highly prized because it is the handwork of a friend who is 87 years of age.

After a few days' stay in the city Mr. and Mrs. Arthur left for their home at Lethbridge, Alberta—Journal.

to conclude that the Wainwright oil field is now receding that recognition which it is so justly entitled to.

In regard to the Maple Leaf company, we understand that Mr. R. Williams, the managing director of that company has issued the statement that a contract for ten years has been made with the Wainwright gas company to supply natural gas to our town to fill the requirements of the recent gas franchise with Mr. C. DeVal.

Mr. Williams says that No. 1 well has an ample supply of gas for the purpose, while the new contract will greatly assist the company in its drilling operations at No. 2 well which is to be carried on at once.

The rocking beam of the standard rig at the Interior company's well meted according to Manager Fred Beresford the indications of this hole being in a full production are being continually verified.

The log of the well is showing a great similarity to the B.P. drillings and it will possibly not be long ere a strike is made at this site. The work is proceeding without a hitch of any kind now and the several strata being reached all give great promise of this being the next real well.

It might be interesting to note that according to newspaper reports the "wonderful" gas well in the south field has now been proclaimed as a "gasser" only, the drillers having reached the Madison line at a depth of 2804 feet. The well is tremendous value for its natural gas, but although oil men contended that it would blow itself in as an oil well this idea has now apparently petered out as it is claimed to be impossible to go deeper on account of the smallness of the hole.

LOCAL REBEKAHS INSTAL OFFICERS CURRENT TERM

On Friday evening last the new officers for the current term were installed by the local Rebekahs by Sister B. Davidson, special deputy, assisted by other past grand dames of the lodge.

The following is now the list of officers for this organization—
P.N.G.—Sis. M. Carrell
N.G.—Sis. L. Howes
V.G.—Sis. L. Gerson
W.—Sis. A. Pearce
Con.—Sis. M. Turner
Sec.—Sis. A. Dunsmore
Treas.—Sis. G. Braecliffe
Chap.—Sis. M. Lilly
R.S.N.G.—Sis. N. Huntington
L.S.V.G.—Sis. F. Laird
R.S.V.G.—Sis. A. Fraser
I.G.—Sis. Lily Howes
O.G.—Mrs. W. Bowen
Mus.—Sis. E. Turner

ATLAS LUMBER CO TO HAVE LARGER PLANT SECOND AVE.

The Atlas Lumber company are this week breaking ground at their new location, near the Ford garage for one of their large standard lumber plants such as they usually erect only at large centers.

This company has operated a line of retail lumber yards in the States for the past fifty years, coming to Canada many years ago to operate sawmills in B.C. to supply their trade in the States.

As the settlers came to the prairies they commenced opening retail yards at the principal points until they are now one of the largest retail lumber companies in Western Canada, most of their yards being in Alberta and Saskatchewan.

Their head office, factory and ware houses are located at Calgary where all the Canadian business is handled and where they also run a large retail lumber yard.

They started business in Wainwright in 1914 in more or less temporary buildings and are now so well pleased with conditions and prospects of this district, that they have decided to erect here a modern plant such as they have at the larger towns and cities. This is one more mark of Wainwright's permanent progress.

COUNCIL TO ASSIST IN OBTAINING MUNICIPAL HOSPITAL FOR DISTRICT

The following are the official minutes of a regular meeting of the Town Council held on Friday evening last when there were present: Mayor Carr and Councillors Forster, Fraser, Knowles, Lissimore and Welch.

The minutes of previous meetings having been read and adopted.

An application was read from the fire chief asking for six firemen's coats and hats, and eight pairs of rubber boots.

An application was read from Mr. R. Caslick for the purchase of lots 8 and 9 in block 12, plan 6445V at a price of \$25 each and the current taxes.

Lissimore-Knowles—That the application of Mr. Caslick be accepted providing a suitable building be erected thereon this year—Carried.

An application was read from Mr. J. Johnston asking for a refund of the unused portion of his license in connection with his restaurant at the Park hotel premises in view of the fact that he is giving up business.

Welch-Forster—That the application of Mr. J. Johnston for the refund of part of his license fee be not entertained—Carried.

A communication from the Amputees' association expressing gratitude was received from the Board of Trade consisting of Messrs J. McLeod and W. Bowen waited upon Council asking that a resolution be passed permitting the provincial government to furnish a representative from the Hospital department for the purpose of furnishing information regarding a municipal hospital district in this area.

The Finance committee reported having examined the following accounts and recommended payment of same—

C.N.R. freight	171.33
A. Pearce, refund	5.00
J. Wilkins, labor	83.20
Bank of Montreal, interest	47.60
E. Boyd, labor	5.00
Alta Gov' Phones	8.50
H. Tennille, pole contract	163.00
H. Renville, extra hauling	38.30
J. Welch, insurance	56.80
J. Spallin, wages	45.00
H. Pigeon, wages	95.00
A. Scudiff, wages	100.00
J. Dous, wages	130.00
H. Frieman, wages	60.00
W. Blinn, salary	125.00
H. Pawling, salary	150.00
H. Pawling, stamps	12.00
R. Bailey, salary	175.00
Mrs. Christenson, salary	20.00
J. Horton, unloading coal	12.80
G. Boyd, grading	25.20
Wain. Pharmacy, supplies	8.04
Wain. Star, printing	19.90
D. Blain, horse-shoeing, etc.	37.15
J. Dawson, Supplies	9.00
Imperial Lumber Co. supplies	3.60
Patriquin & Johnson, audit	41.50
Tofield Coal Co.	123.05
Dismal Coal Co.	124.25
Cranz, Ltd., supplies	85.60
W. Bibby, draying	25.54
Wain. Machine Shop	11.64
Metals, Ltd., supplies	4.21
Atlas Lbr Co., coal	41.66
Atlas Lbr Co., supplies	2.50
Bank of Montreal, bills payable	287.90

Forster-Knowles—That report of Finance committee be reported and cheque issued—Carried.

Forster-Welch—That the application of the half-year ending June 31, 1925 be accepted—Carried.

An account from the Dept. of Natural Resources, for the maintenance of the Byron children was placed before Council.

Forster-Welch—That the account from the Attorney General's department re Byron Children be placed in the hand of the solicitor to take up the matter with that department—Carried.

The Electric Utility committee reported as follows—

The work on the alterations and extensions to the pole line is being satisfactorily carried out by the superintendent. The new poles are now all set and the high tension line featuring the three-core transformers are being and the street lights all replaced on the new poles. About one half of the pulling of the old line is completed and the work of the proper grounding of the system is now in hand. There is yet one transformer to rehang and one street light to install.

The old poles are now being pulled, and we would recommend that the superintendent be authorized to have these carted and stored at the material yard at the power plant. The work will all be completed in about two weeks. We would also recommend that the Council ratify the action of the committee with regard to the salary changes at the power plant; these being altered during the time the superintendent is on the outside work as follows—1st man, 110.00; 2nd man, 100.00; and 3rd man, 90.00 respectively until superintendent is again back on shift at the power house.

Forster-Knowles—That the report of the Electric Utility be adopted—Carried.

The committee on Health, Parks and Cemetery reported that in company with a committee from the Women's Institute we have inspected the cemetery and found that the fence was down in a number of places, brush was growing over many of the best lots and the roads and paths so overgrown with weeds and grass that it is impossible to tell where some of the lots are. Considerable work is needed to put the cemetery in a reasonable condition.

The W.I. have some money to expend on this work and have agreed to pay half of the expense incurred for same.

Mr. A. Love has agreed to cut the weeds with mowers for the W.I. cemetery. We have also asked Mr. McLeod, the undertaker, to check up with our secretary on lots sold, with a view to collecting for the unpaid lots, as there will be some revenue from this source.

We intend to hire help to proceed with this work, discuss the most pressing first—such as brushing and repairing fence. If there is time and can get the help we intend to do up to \$200.00 of work, the expense for which will be borne half by the W.I. and half by the Town. At present we do not expect to use that much money this year.

The committee from the W.I. had power to act, and have agreed to the above as it pertains them.

Welch-Forster—That the report be accepted—Carried.

The committee on Public Works and Scavenging reported that Second Avenue is completed to a graded road to Government road allowance. An agreement has been consummated with Municipality officials whereby in consideration of this continuation to their road allowance they are willing to take over the work of grading the part for one half of the actual cost of the work on Second Avenue, and not in any case more than \$100.00.

In addition to the above work the officials of the adjoining municipality are willing to construct a piece of road (being a continuation of Main street) to Clawson Avenue, which will connect with their thoroughfare, for actual cost of brushing, plowing and gasoline for tractor while in the on work of grading. This work should not cost more than \$40.00 and we recommended that this be done.

Regarding the scavenging, your committee held a special meeting at which the Mayor and Contractor Bailey were also present, and several matters pertaining to the work under the contract were discussed. It was decided to give Mr. Bailey the privilege of utilizing the daylight hours for cleaning out cesspools for fifteen days from that meeting in order that they may be put into first-class shape. Several other matters were discussed and satisfactory intentions portrayed by contractor.

In addition to above, several repairs are necessary at Town Hall; these will come well within the allowance for building maintenance.

Knowles-Forster—That the report of the Public Works and Scavenging committee be adopted—Carried.

The memorandum of agreement for the natural gas franchise, made and entered into on the 22nd day of July 1925 between the Town of Wainwright and Claude L. DeVal, was placed before Council.

Welch-Forster—That the copy of gas franchise agreement, as now signed and sealed by the respective parties be accepted—Carried.

Knowles-Lissimore—That provincial government Department of Public Health (hospital division) be petitioned to furnish a representative to get in touch with interested municipalities in this area, with view of the possibilities for establishing a municipal hospital area here—Carried.

Forster-Welch—That the usual assistance be afforded the secretary's office to get out the tax notices during the month of August; the amount not to exceed forty dollars—Carried.

The Council then adjourned.

WAINWRIGHT, ALBERTA, AUGUST 12th, 1925

CAUSE OF POOR EXAM. RESULTS

The average of intelligence in chil-
dren of school age remains about the
same year in and year out. The av-
erage of industry remains about the
same. And the average of teaching
ability does not vary from year to year.
Then if there is a high number of
failures in school examination, to
what must the result be attributed?

Either that the examination papers
have been set at too high a standard,
or that the examiners are too severe
in marking papers. There is no other
answer.

When we hear regarding the results
all over the province, that they were
not as good as expected, it can mean
only one of two things; either the
papers were too severe, or the exam-
iners who marked the papers were too
critical.

EDIT POLICING THE SMALL TOWN

Have you ever stopped to consider
the task of the police constable of the
small town? Have you ever given a
thought to the many unpleasant duties
confronting that very important of-
ficer? Before you next criticize the
policeman of your town, stop a minute
and think what YOU would do.

In the small town, the personal con-
tact, between the policeman and the
individual citizen, often makes it more
difficult for the officer to perform
his duty, than in the case with the
city officer who performs
his work like a machine and actually
knows but few of the people over
whom he has jurisdiction. The immen-
sity of the population makes it all the
easier for him to work in an impersonal
way, while the lot of the small-town
police officer is just the opposite.

THE NEW GOVERNOR GENERAL

Regret at Lord Byng's inability to
accept an extension of his term as Gov-
ernor-General has been universal in Can-
ada. His Excellency's services as com-
mander of the Canadian Corps gave
him a special claim to the respect of
the Canadian people, and the ability
and tact with which he has discharged
his duties as Governor-General have
won for him the goodwill and affec-
tion of the whole Canadian people.

THE TRANSFER OF NATURAL RESOURCES

The question of the transfer of nat-
ural resources is as large a problem as
the government and the people of this
province have ever faced.

To possess our resources is a nat-
ural desire. But the fairness of the
deal to be made concerning them is not
the only factor. There is also the ques-
tion of the possible results. Possession
considered from the point of view of
the capacity of the present government.
After three years Alberta will be on
its own resources if this new arrange-
ment goes through, without any sustain-
ing financial assistance from the Dominion
government. There are, of course, a
number of possible eventualities that
may precede the completing of a trans-
ferring agreement or the turning over
of the resources to the province.

When we hear regarding the results
all over the province, that they were
not as good as expected, it can mean
only one of two things; either the
papers were too severe, or the exam-
iners who marked the papers were too
critical.

EDIT POLICING THE SMALL TOWN

Have you ever stopped to consider
the task of the police constable of the
small town? Have you ever given a
thought to the many unpleasant duties
confronting that very important of-
ficer? Before you next criticize the
policeman of your town, stop a minute
and think what YOU would do.

In the small town, the personal con-
tact, between the policeman and the
individual citizen, often makes it more
difficult for the officer to perform
his duty, than in the case with the
city officer who performs
his work like a machine and actually
knows but few of the people over
whom he has jurisdiction. The immen-
sity of the population makes it all the
easier for him to work in an impersonal
way, while the lot of the small-town
police officer is just the opposite.

THE NEW GOVERNOR GENERAL

Regret at Lord Byng's inability to
accept an extension of his term as Gov-
ernor-General has been universal in Can-
ada. His Excellency's services as com-
mander of the Canadian Corps gave
him a special claim to the respect of
the Canadian people, and the ability
and tact with which he has discharged
his duties as Governor-General have
won for him the goodwill and affec-
tion of the whole Canadian people.

THE TRANSFER OF NATURAL RESOURCES

The question of the transfer of nat-
ural resources is as large a problem as
the government and the people of this
province have ever faced.

Both Lord and Lady Byng have let it
be known that they highly appreciate
the sentiment of being asked to con-
tinue their residence in the Dominion
for another term; but they have not
been able to see their way to accept
the invitation. As Lady Byng put it at
a women's luncheon at Vancouver dur-
ing their recent visit there: "We talked
the matter over and considered it
from every angle but finally decided
we could do more for Canada in Eng-
land than by staying longer here."
They will thus be following in the foot-
steps of other ex-Governors-General
and their ladies.

It was at a Vancouver function also
the other day, that a speaker expressed
the hope that Earl Haig would be
Canada's next Governor-General. The
suggestion, needless to say, was greet-
ed with great cheering. There could
be of course, no question of the popu-
larity of such an appointment, should
Lord Haig see his way to accept it.
We deprecate, however, the reflection
contained in a remark from the Lon-
don correspondent of an English prin-
cipal daily: "When the time comes
for a new Governor-General for Can-
ada to be appointed it will be made
very clear to the Imperial authorities
that the Dominion no longer desires to
have a mere party man from home as
its titular head." Canada has been sing-
ing its praises in Governor-General
who have kept free from party politics
either British or Canadian.

SUBSCRIBE TO THE STAR

Here and There

During 1924 the 1,500 bee-keepers
of Manitoba marketed 1,302,000
pounds of honey, valued at \$185,000,
according to official returns by the
Provincial Apiarist.

Prof. J. A. Allen, Provincial Geo-
logist of Alberta, declares in an official
statement that sixty-two billion
tons of coal, half of which is re-
coverable, lie beneath the surface
of Alberta soil.

Seymour Backus, Vice-President
of the Borden-Brooks Company, of
Winnipeg, states that the largest
producing pulp mill in the world will
be in operation at Kenora, Ont., be-
fore the end of 1925.

It is estimated that Vancouver
will ship approximately 25,000,000
bushels of grain of the 1924 crop.
Shipments already total 21,188,000
bushels. Commitments for almost
1,000,000 additional bushels have
been made.

The special train operated by the
Canadian Pacific Railway and known
as The Trans-Canada Limited, which
makes the journey across the entire
country in eighty-eight hours, re-
cently commenced its season, the
seventh since its inception.

According to a bulletin issued by
the Bureau of Statistics, Alberta's
foreign population is in excess of
180,000 with approximately 100,000
American included in the total.
About 5,000 Americans reside in
Calgary.

When Their Majesties King George
and Queen Mary paid their official
visit to the British Empire Exhi-
bition at Wembley shortly after the
opening, they boarded the miniature
Canadian Pacific train and
made a trip around "Treasure Is-
land" and expressed great interest
in all they saw.

An effort will be made this year
to transplant Swiss mountain roses
in the Canadian Rockies. These
roses, which were brought from
Switzerland by Dr. Huebscher, late
Swiss Consul at Montreal, are ex-
tremely hardy and only thrive above
elevations of 8,000 feet. They will
be planted in the gardens at Lake
Louise and Banff.

The first trip of the Canadian
Pacific S.S. Princess Kathleen from
Vancouver to Seattle via Victoria
was recently made under most suc-
cessful conditions. The people of
Seattle are so enthusiastic over the
increased coastwise service that
they have tendered an address of
thanks to Captain Troup, manager
of the Canadian Pacific Coastal ser-
vice.

There is every possibility that the
Provincial Government of British
Columbia may this year complete
the construction of the scenic high-
way connecting Golden on the main
line of the Canadian Pacific Rail-
way with the summer resorts of
Banff and Lake Louise. When this
link, much of which was built dur-
ing the past two seasons, is com-
pleted it will make one magnificent
triangle through the heart of the
Canadian Rockies.

Building permits issued in Can-
ada during the first quarter of 1925
were 10.2% and 1.2% greater than
in the first three months of 1924 and
1923, respectively. There were also
6.5% greater than in the first quar-
ter of 1922, 46.5% higher than in
1921 and 4.3% above the 1920 total.
The aggregate value of building
permits issued for the first quarter
of 1925 was \$10,672,637, compared
with \$17,840,969 for 1924 and \$10,
661,169 for 1923.

JUDICIAL SALE OF FARM PROPERTY

Pursuant to the Judgment and Final
Order for sale, there will be offered
for sale by J. W. Stuart Esq., Auction-
eer, at The Wainwright Hotel in the
Town of Wainwright, in the Province
of Alberta, on Saturday the 22nd day
of August, A. D. 1925, at the hour of
two o'clock in the afternoon the fol-
lowing property, namely:
The South West quarter, Legal Sub-
divisions 2, 7, 10, 15 and 16, and the
West half of Legal Subdivisions 1, 8
and 9, of section four (4) in township
forty four (44) and Range five (5)
West of the fourth meridian; contain-
ing four hundred and twenty (420)
acres more or less; reserving all mines
and minerals.

There are 225 acres of summer-
fallow upon the premises; 180 acres of
hay and meadow land and 15 acres
of slough land. The land is fenced
with willow posts and two strands of
barb wire.

There is a small frame dwelling,
a frame granary, a log stable and a log
chicken house on the property.

The property is situated five miles
from Greenhills Post Office, where
there is an elevator and is 2 1/2 miles
from a school.

There is a good water well on the
property.
The soil is a clay loam, with some
sandy spots, on a heavy clay sub-soil.
The property will be sold subject to
a reserve bid and to all outstanding
taxes, rates and assessments.

The terms of payment are, 10% of
the purchase price on the day of sale
and the balance within 60 days there-
after without interest.

In all other respects the standing
conditions of sale of the Supreme
Court of Alberta will govern.

Further particulars may be had from:

THE EXAMINER'S WEEKLY REVIEW OF PROV. MARKETS

CATTLE

BEEF—The majority of the receipts at Edmonton were common cattle and this had a tendency to make the market drab. Choice heavy steers \$4.75@5.50; choice light \$4.75@5.50; good \$4.40@4.50; medium \$3.50@4; common \$3.50. Choice heifers \$4.50@5; good \$3.50@4 Choice cows \$3.25@4 Choice cows \$3.25 @ \$3.50; good \$2.50@3; medium \$2@2.50; common \$1.75@2.25.

J. C. McLEOD & SON
Funeral Directors and Embalmers. Complete stock of funeral supplies. Prompt and careful attention exercised.
Second Avenue Wainwright.

canners \$1.25@1.75 Choice bulls \$2@2.25; medium \$1.50@1.75; common \$1.00 up Choice calves \$5@5.50; common \$2@3. FEEDERS, STOCK KERS—There was a brisk demand for good feeders, and they sold from \$2.50 @ \$4; stock steers \$2@3.25; stock heifers \$2@2.50; stock cows \$1.50@2.

HOGS

On the Edmonton market a strong tone is very noticeable, and the majority of the sales are at \$13, with a 10 per cent premium being paid for bacon.

SHEEP

Quotations unchanged and very few are being handled.

GRAIN

In the southern part of the province harvesting is under way and a little has been done in the north. Reports of rust in Manitoba, and injury to crops in the Canadian west through drought and heat, has caused prices to advance somewhat since last week.

BUTTER—CHEESE

CREAM—No change has taken place in either Saskatchewan or Alberta but Manitoba has come into line with the last jump and are now paying the same as Saskatchewan. Receipts at the creameries are about even with last year although in some districts it is very noticeable that they are not handling the amount they were CREAMERY BUTTER—While prices are the same as last week this market has a very strong tone, for the export market is demanding shipments. The coast market has been booked up for the next two months, so shipments are being made east to get rid of the surplus.

CHEESE—Manufacturers in Ontario are trying to satisfy a large demand that is coming from export interests with shipments from the west, which naturally gives a strong tone to the market here. At present values are the same as last week.

POULTRY—EGGS

EGGS—Receipts are light and dealers say that they can hardly get enough to take care of the demand, but at the same time it is of no use to advance prices in hopes of getting them, for they are not being laid, and consequently cannot be marketed. Storage poultry—This market shows no change from last week, except that the deal-

ers find they could handle more birds. Some of the buyers are trying to load cars in the country but are having no success. They advise farmers to turn birds off now for prices will not go higher, and if they wait till fall, although birds will weigh more they are going to get less money for them.

POTATOES

Alberta grown spuds are coming on to the market in larger quantities each week, and this has forced prices on the shipments from the coast down. Quotations are about \$37@38 f.o.b. Calgary which is a reduction in value of approximately \$20 per ton. Alberta spuds are worth about \$40 per ton.

HOOT GIBSON IN LATEST VEHICLE COW-BALL STAR

He was a careless catcher, some sport writers said. But they all agreed that that a more valuable man than "Swat" Anderson was never known to baseball's annals.

He could be depended upon to break up the toughest game. Thanks to his trusty willow, the Sox were lead in the league, and it set for the great classic, the World's Series.

"Swat" always kept in training. Occasionally he would attend a little party, even apologize to thugs who might intentionally trip him at a dance, especially when "Swat" was with Joan McCarthy.

This time, however, the ruffian swung at the inoffensive diamond star "Swat" beat him to the punch. In a flash, half a dozen confederates pounded upon him. When he came to, he was bound hand and foot. Joan was nearby, equally as helpless. It must be past noon, they thought.

At the ball park, the umpire's voice boomed: "batters up."

The deciding game of the season was being played. Everybody shouted

for "Swat" The best detective, were on his trail. When the scoreboard was recording the Sox's certain defeat, two detectives made a discovery which shook big league baseball to its very foundation. This and more... a series of gripping situations with that inimitable smiling star, Hoot Gibson, in his strongest production, "Hit and Run" which shows to-night and Thursday at the theatre.

KEEP STILL OR GET OUT

Back seat drivers—darn them! Who of us hasn't, at one time or another, been driven nearly crazy by their supposedly helpful advice? And why is it that these pests who, usually knowing nothing whatsoever about automobile operation, take it upon their shoulders to tell us what to do, or the person who does know, how to drive, insists upon directing or criticizing the way we handle our machines?

And now, reader, when you pass my little story along to friend with, my advice is to duck—because you're due for a hawling out. (Me, too, if my better-half reads it.) But here goes: You are about to roll your bus across a street car line. A block away a trolley is approaching but there is sufficient time for you to cross. But Friend wife yells, "John, Stop! A car coming!"

And because you are a married man, "Stop!" registers immediately upon your old sub-conscious mind before the conscious mind has a chance to analyse the situation. It is only because you are an old timer at the driving game that a serious accident is averted.

And all courtesy due the wife we realize that she didn't intend to phony you or herself in danger, but merely neglected to take into account the fact that a car traveling twenty miles an hour requires thirty feet to come to a stop.

And twisting the tale about to the male of the species, what wives could say about their funny husbands would be plenty. In many cases the husbands have taught their wives to drive, hence their oft repeated—"Watch yourself, Baby!"

To my mind women are far better drivers than men, their intuition always coming to their aid in an emergency.

So—to husbands and wives, and all other back seat drivers—KEEP STILL OR GET OUT!

Stick together and fight this deadly disease, or sooner or later we will be doing our back seat driving under the influence of ether.

And to those of you who do not drive or understand the workings of gas wagon, bear in mind that a driver knows his car, that distance is judged differently from the driver's seat; that confidence in the driver and a little individual self control will give you, and other occupants of the car an enjoyable ride.

Ignore this philosophy and sooner or later you will be told to—KEEP STILL OR GET OUT!

***A piece of machinery is dependable only as long as it is properly cared for; you cannot afford to be without an implement shed. You need one! Must have one; so why delay. See us for plans and specifications; let's get started NOW.—Imperial Lumber Co. McI Fraser phone 1-0

(Continued from page 2)

with the scraggy green plume, untried, three onions, and a miscellaneous handful from the bottom of one pocket which he turned inside out and shook into the can, blundering indifferently to the fact that articles which were not strictly edible had also joined in this last minute avalanche.

Then, with a sigh of relief, Potts sat down to await the satisfactory moment when the stew would be thoroughly cooked. To Bob fell the task of stirring the steaming mess which he used as a poker to goad the fire.

Meanwhile, during the foregoing preparations, Potts had alternated his culinary incantations with an eloquent description to Bob of the history and nature of this place in which the fate of the night road had taken them. Potts told Bob that in the first years of the trestle's existence over Granite Gorge, rockslides from Old Witch's Mask—so called because its towering face, nosing close to the midline of the sharp curve around which the tracks approached the Gorge, hid the trestle from view until the last moment—had been disastrously troublesome. For a long time the Old Witch's dirty face had shed boulders, like fox scales from a countenance of evil and sin, despite the cultural efforts of the road's best construction engineers who massaged and braced and cared for the complexion of the Old Witch as carefully as the skin of a testy dowager might be treated in a beauty parlor. Finally their work had won comparative safety for the Gorge passage; rocks showed down no more and, as twenty years went by without a slide, the locomotive drivers no longer slowed up at in the old days, except to the point dictated by ordinary caution. "The Limited Mail," the Transrockian's named flyer, habitually was taken across the Gorge at thirty-five an hour and better.

To people moving on the lawful business and pleasure traffic of the world the bald and forbidding nakedness of Granite Gorge, high and deep in the lost places of the Rocky Mountains gave no invitation to linger. There was plenty "for to see"—once—in its sheer immensity of drops and junctures and leaps but nothing "for to admire" because it was with sinister and not with gracious strokes that Nature had sculptured here. A chill wind constantly brushed the railroad trestle span; and like a rattler's incensed warning the narrow granite gash gave back the labored roar of passing engines and impatient trainmen and passengers breathed easier when the Gorge passage lay behind. It was with wisdom and forethought, the legitimate accommodation of necessity to virtue, that the Transrockian directors had arranged their through schedules so that the several crack flyers of the road crossed the Gorge at night.

"The Old Witch is a nice girl," mock or ribald trainmen, "when she's asleep." (Concluded next week)

HOT WEATHER ADVICE

By ERWIN GREER

(President Greer College, Automotive Engineering, Chicago)

During the hot months you should see that the radiator is continually flushed out and filled with clean water. In connection with this efficient fan belt adjustment should be made, for the fan is needed more than ever in summer. The position of the spark lever should be watched to see that it is kept in an advanced position, for this insures better cooling of the engine. Generally speaking, a car operates at least expense per mile when it runs in high gear with the spark advanced but not always. This condition is a most extravagant one when the car is running slowly, first because the spark is then to early, producing a spark knock and second, because the power impulses are farther apart and the action is therefore less even, power

What the World Is Doing

Eticell Guide for Neck Shave Saves Using Mirror

Self-administered neck shaves are simplified with the help of a celluloid eticell that fastens to the back of the head

with strings and a clasp and has slots in the edge to guide the razor. The accessory makes a mirror unnecessary and can be used both for the side and rounded styles.

Solve Mystery in Language of the Honey Bees

That bees have a language by means of which they can communicate with one another about new-found feeding grounds, the kind of flowers to visit and their general direction from the hive, appears to be proved through experiments made by a German scientist. He found a swarm of bees would visit the place where sugar was exposed immediately after one of them had fed and returned to the hive to spread the news. The bee does so by a peculiar dance. By marking bees with colors and feeding some while leaving others unfed, the experimenter proved that only those which had been fed would start the dance that brought swarms to new feeding grounds.

Movies for Ship Passengers to Cure Seasickness

Seasickness is believed to be due partly to strain on the eyes caused by the constantly shifting planes of the ship. To counteract the effects of this movement

Radio Test Light Saves Tubes

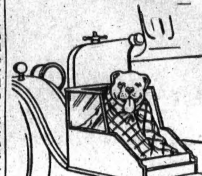

A useful radio test light can be made from the base of a burned-out tube and a double-contact auto-lamp socket. Remove all glass and internal wiring from the base, leaving the metal shell and the four prongs intact. Connect the two terminals on the auto-lamp to the filament prongs on the tube base by means of lengths of small flexible wire, soldered in place. Place the socket in the position shown, and run melted sealing wax around it, holding it firmly until the wax has set; place a 6-volt, 2-amp. auto lamp in the socket and the test lamp is complete. To test the circuit, place the lamp in the tube sockets in the regular manner and note the result. If the circuit is correct, the lamp will light.

Removing Grass along Fence

Grass along fence posts can be burned away with a common gasoline blowtorch without injury to the posts, if a wet gunny sack is taken along. The grass will burn quickly and the gunny sack is then used to quench the embers. This is an easy and simple method and eliminates the danger of burning the posts close to the ground.

Kennel on Running Board Has Glass Windshield

For the convenience of dog owners wishing to take their pets with them on automobile journeys, a compartment has been designed by an English motorist to

carry his bulldog, which acts as guardian while the car stands unattended. The upper part of the enclosure is of glass and it can be placed on either end of the running board.

Cleaning Spark Plugs

Few car owners "enjoy" disassembling spark plugs and laboriously removing carbon particles with a knife and sumpo. A good method of doing this is as follows: Immerse the plugs in a fruit jar partly filled with muriatic acid; the length of the bath may be from 10 minutes to an hour, depending on the strength of the acid and the condition of the plugs. Afterward wash the plugs in water.

Heat Treatment is Another Good Method of Cleaning Spark Plugs

The plugs are placed in a hot box bath, a saturated solution being used. The shells are placed in a fire, heated almost red and are then plunged in cold water.

Scratches can be removed from furniture by rubbing well with a solution consisting of equal parts of salad oil and vinegar, and a soft rag. After the scratches have disappeared polish can be applied.

SILAGE SUBSTITUTES ON SMALL FARMS

On many small farms, on account of the comparatively construct and fill a silo with suitable silage crops. In such cases, provision should be made for a supply of succulent feed other than silage. While under average conditions, food value in roots cannot be grown and stored as economically as in a silage crop such as corn, due to the labour of growing, harvesting and cost of storing, undoubtedly, under the conditions mentioned above, roots form the most economical substitute for a succulent crop such as silage. They are to be recommended particularly for late fall and early winter feeding, the difficulty of keeping them throughout the late winter and early spring prohibiting their use at these times.

Where roots are not available and late winter feeding dried beet is well worth considering as a substitute. The by-product of the sugar-bee industry is available in considerable quantities in the late fall and early winter, and may be stored indefinitely provided it is kept dry. It should all ways be soaked before feeding, as it will take up about three times its own weight of water, and swells proportionately. The addition of a little feeding molasses, while soaking improves the palatability of beet pulp. Experiment conducted in the Division of Animal Husbandry have shown that dried beet pulp gives its best and most economical results when used to replace the meal mixture or roots of an already well-balanced ration, rather than when used as a substitute for other succulents, such as silage, in the ration. Nevertheless, where silage is not available, dried beet pulp in small quantities (about five pounds dry weight daily) should yield profitable returns. Dried beet pulp should be procurable at approximately the ruling prices for wheat bran.

STANDARD OF RURAL HOTELS TO BE RAISED

Greatly improved conditions in the small town and village hotels of the province are likely to be brought about as a result of the survey of rural hostilities which is now being made by officials of the liquor control board. The purpose is to raise the standard of service to the traveling public, according to an announcement made by the department.

For some time an agitation along these lines has been conducted by the commercial travelers of Alberta, who have made representation that some of the smaller hotels were not up to the mark, and it is probable that their efforts will be effective in having a betterment brought about.

There will be a general check-up of conditions with regard to sanitation, especially where there are no sewerage facilities, and in the furnishings of the bedrooms of the hotels. The practice that has prevailed in some hotels of sub-letting the dining rooms is also being discouraged by the board.

When the reports of the inspectors have been received it is expected that there will be some sharp reprimands handed out, and unless a change in

Goodbye or Au Revoir?

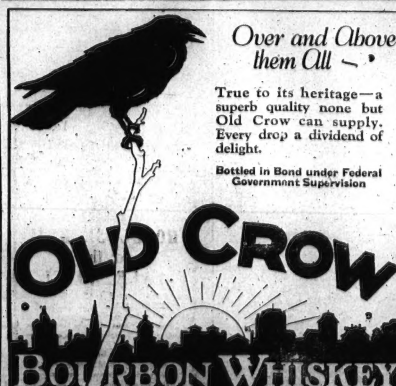

The departure of Field Marshal Earl Haig of Bemerdyde from Montreal on the Anchor Donaldson Steamship Ltd., Friday July 31, was celebrated with full military honors. The ship and harbour were decorated with flags and crowds thronged the quay-side to obtain a last glimpse of the great soldier who was Canada's guest. He may return in an official capacity.

Over and Above them All

True to its heritage—a superb quality none but Old Crow can supply. Every drop a dividend of delight.

GREER COLLEGE ACQUIRES U.S.V.B. ELECTRICAL SCHOOL

The United States Veterans' Bureau Electrical trade school has just been sold to the Greer College of Automotive and Electrical Trades, Chicago. The U.S.V.B. school was one of the most completely equipped electrical schools of its kind in the United States, and is said to have cost the Government approximately \$250,000 for equipment and installation. The modern up-to-date equipment has been moved to Greer College and will be used henceforth in a new course of training in practical electricity now being offered by Greer College. In acquiring the U.S.V.B. school the Greer College has placed itself in a most advantageous position for teaching ambitious men the fundamentals of the electrical trade in addition to the automotive business, in which it has specialized for the past twenty-three years with many thousands of successful men to its credit.
